

Common-support E39: fixed trajectories of every low/high parent

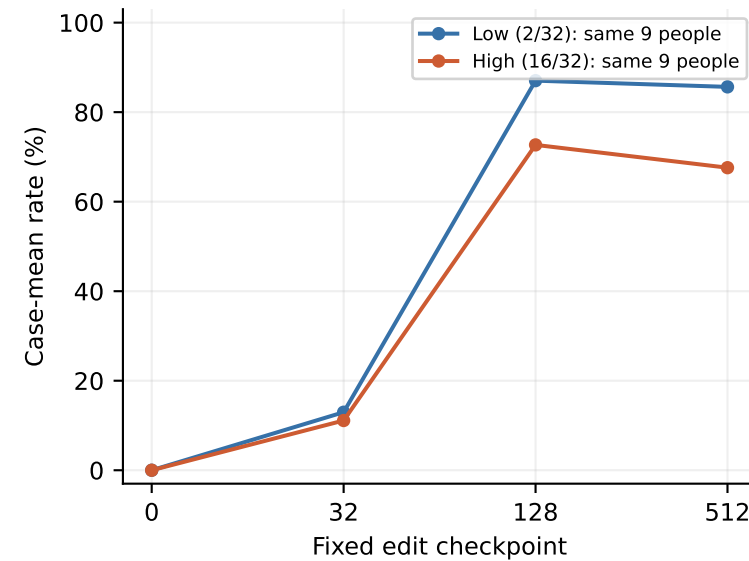

24 parent models, 96 edits; 24 cases per phase/update type; 2 development worlds × 2 initializations

Coherent | Edited facts E

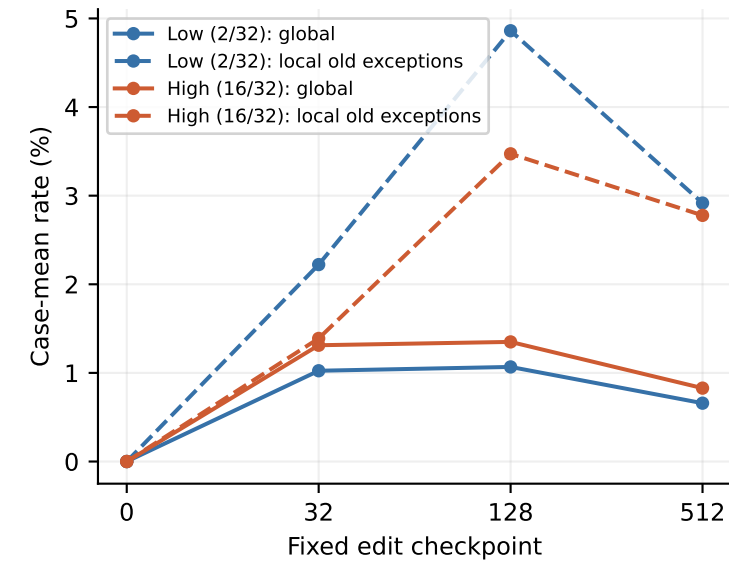

Step512 totals
low: roots: 72/72; actual: 864/864
high: roots: 72/72; actual: 864/864

Coherent | Heldout D: paired reference

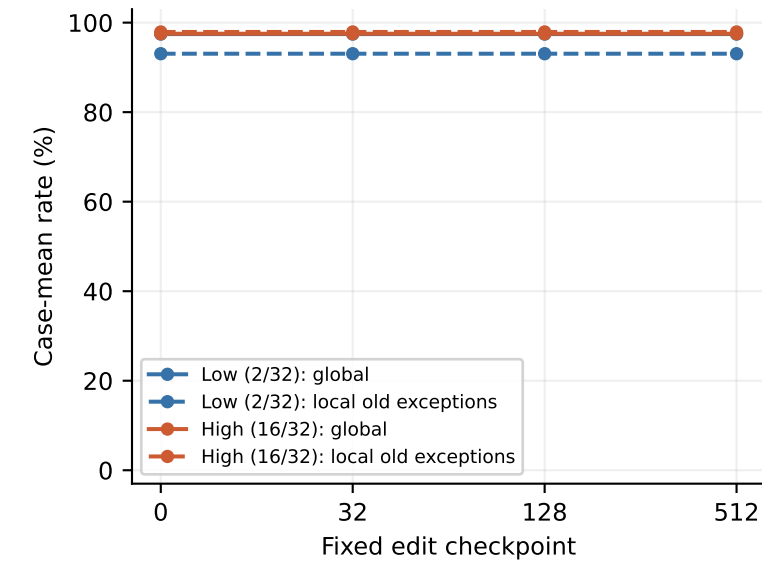

Step512 totals
low: same 9 people: 185/216
high: same 9 people: 146/216

Coherent | Retained knowledge damaged

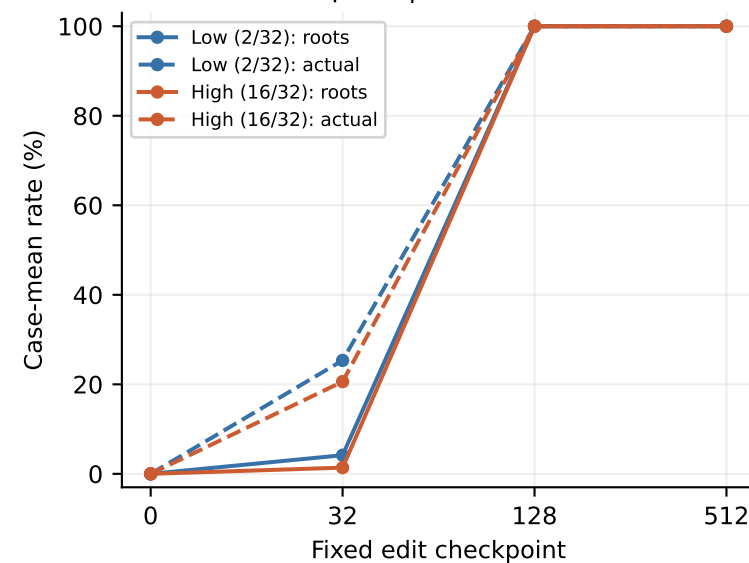

Step512 totals
low: global: 3,126/478,783; local old exceptions: 4/134
high: global: 3,967/479,155; local old exceptions: 4/141

Coherent | Knowledge known before editing

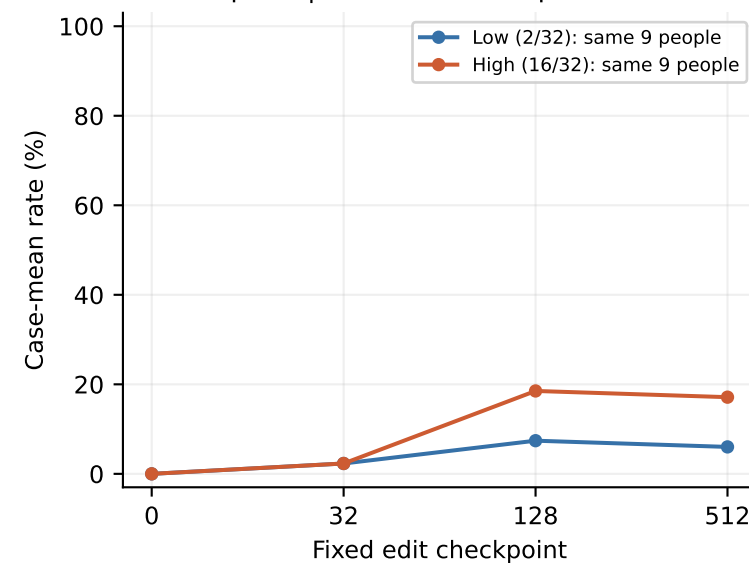

Step512 totals
low: global: 478,783/491,352; local old exceptions: 134/144
high: global: 479,155/491,352; local old exceptions: 141/144

Exception | Edited facts E

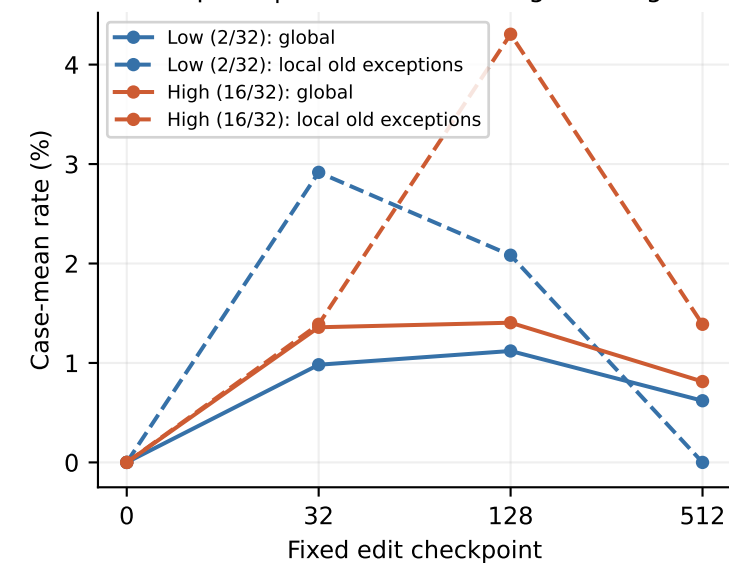

Step512 totals
low: roots: 72/72; actual: 864/864
high: roots: 72/72; actual: 864/864

Exception | Heldout D: exception conflict

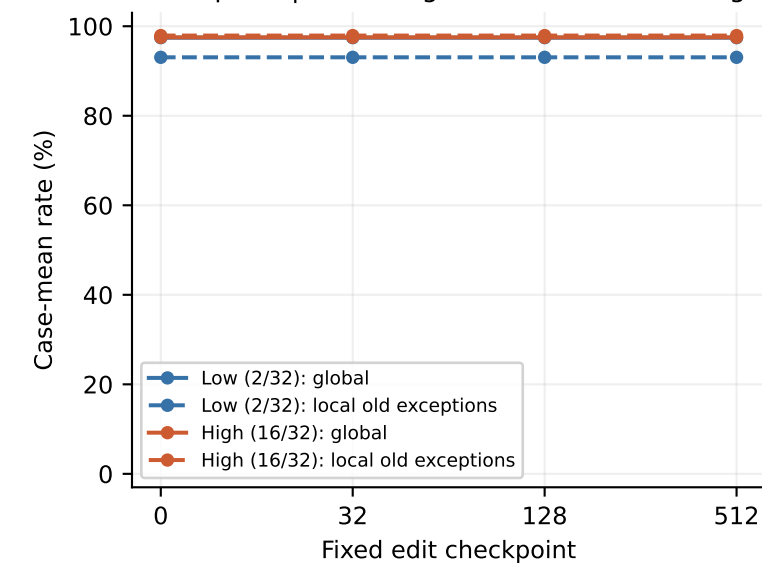

Step512 totals
low: same 9 people: 13/216
high: same 9 people: 37/216

Exception | Retained knowledge damaged

Step512 totals
low: global: 2,938/478,783; local old exceptions: 0/134
high: global: 3,893/479,155; local old exceptions: 2/141

Exception | Knowledge known before editing

Step512 totals
low: global: 478,783/491,352; local old exceptions: 134/144
high: global: 479,155/491,352; local old exceptions: 141/144

E counts = correct/total; D counts = correct/total (9 per case); damage counts = broken/old-correct; coverage counts = old-correct/pool.
Rates weight cases equally; integer totals provide denominators and need not equal the mean rate. Local U = unchanged actual-city facts of original exceptions in the 3 edited groups (6 per case).
